

**SuppliMate
K-Mg-SO₄**

Specifications:

Guaranteed analysis:

Sulfur (S).....	min. 22.0%
Potassium (K).....	min. 18.0%
Magnesium (Mg).....	min. 11.0%

Description: Feed-grade potassium-magnesium-sulfate. It is a source of highly available potassium (K), magnesium (Mg) and sulfur (S) that will help meet animal and poultry requirements for these essential nutrients.

Typical Screen Analysis*:

% Retained U.S. Screen:	
+35 mesh	95 %
+65 mesh	98 %
Passing 65 mesh	2 %

Typical Chemical Analysis*:

Sulfur (S):	22.0%
Potassium (K):	18.21%
Magnesium (Mg):	11.15%

Physical Characteristics*:

Bulk Density: 88-99 lbs/ft³
Typical Moisture: < 0.5%
Appearance: Fine white and pink crystals
