

POTASSIUM CHLORIDE
(coarse)
KCl

Specifications:

Guaranteed analysis:

Potassium Chloride, not less than	94.0%
Potassium (K), not less than	49.5%

Description: Feed-grade potassium chloride. It is a source of highly available potassium (K) and chloride (Cl) that will help meet animal and poultry requirements for these essential nutrients

Ingredients:

Potassium Chloride

Typical Screen Analysis*:

% Passing U.S. Screen #:	
14	90.0%
35	35.0%
65	4.0%

Typical Chemical Analysis*:

Potassium	50.0%
Chlorine	47.2%

Bulk Density: 65-70 lbs/ft³

Appearance: Coarse white crystals

* These are typical analyses and are not intended to be guarantees.
